Lancaster Farming

OL. 11 NO. 12 Lancaster Farming, Saturday, February 19, 1966 $2 Per Year

THIS TOBACCO IS SOLD and on its way to the American Tobacco Co., but Robert Weaver gave the camera a quick glimpse of the quality filler leaf which came from his one-acre, FFA tobacco project last year. L. F. Photo

County FFA President Plans For Farm Future

Robert Weaver, the recently-installed president of the Red Rose Future Farmers of America Chapter is thinking beyond his present junior year in high school He hopes, at least at this time to graduate directly from high school to farming

Bob is the sixteen-year-old son of Mr and Mrs Ivan Weaver of Strasburg R1, the youngest of their four children The Weaver family presently operates a 30-head Holstein dairy on their 60-acre farm, the operation of which will shortly be taken over by Bob's brother.

In addition to his duties in the county chapter, he is also president of the Garden Spot Chapter at Lampeter-Strasburg High School. His agriculture instructor, Gerald Kiger, describes him as a good student, and one who is not afraid of a little hard work Besides agriculture, Weaver reports his best school subjects as English and Bookkeeping, and describes his favorite pastime as deep sea fishing

Bob has been extremely busy with his FFA-related activities In season these

4-H Play Is Set For March 4 & 5

The annual play presented by county 4-H'ers has been scheduled for March 4 and 5, Friday and Saturday, at 8 p m It will be held at the Manheim Township High School, Neffsville

With the title "Here We Go Again", this comedy about an ordinary family and the things that happen when the teenage daughter gets involved with high society, and the father gets involved with politics, promises to be an evening's worth of entertainment

The cast includes Ronald Long, Linda Ney, Pat and Audrey Yunginger, Ken Rutt, Mike Smucker, Janet Groff,

NEPPCO Poll Shows Members Oppose Controls

TRENTON, N.J. — In testimony presented to the Committee on Agriculture and Forestry earlier this month, Richard I. Ammon, executive director of the Northeastern Poultry Producers Council, stated that NEPPCO members oppose proposed nationwide egg marketing order legislation by an almost 9 to 1 margin

The Committee was considering S.2832, introduced by New Jersey's Senator Case. It is a form of enabling legislation which will permit the development of a Marketing Order for the entire table egg industry. S 2832 is essentially the same as H R. 7481 — the Resnick Bill — which was introduced in the House last year.

To substantiate his statement, Ammon released the results of a poll taken recently among NEPPCO members showing that of those who responded, over 85 per-

Pesticide Research To Expand At Penn State

Experiments involving pesticides will be expanded at State University with the establishment of a combined Pesticide Research Laboratory and Graduate Study Center within the department of entomology

The new facility, the first of its kind at a land-grant college, was approved recently by the General State Authority of Pennsylvania and is proposed for completion in 1968 at an estimated cost of $400,000, including federal funds

Donald E. H. Frear, professor of chemical pesticides and project coordinator, says the facility will be used specifically for research on chemical pesticides, biological control of pests, and analysis of pesticide samples from experiments by other departments as well as samples

Community Meeting To Probe The Problems Of Watershed Pollution

Community interest, hopefully followed by community action, in correcting existing watershed pollution problems and preventing such future problems, will be the theme of a meeting next week at the Martindale Fire Hall, according to Miles W. Fry, Ephrata R3.

The area under fire is the "upper Conestoga watershed", from Martindale to Hinkletown and north. The streams involved are the Big and Little Muddy Creeks, Fry said. "This has been a problem of varying degree for twenty years, and now we want some action on it," he added.

Area industries bordering the streams include a rendering plant, two hat factories, two municipal sewage disposal plants, and a steel plant, Fry pointed out.

Representatives of the industries concerned will be invited to Wednesday's meeting at 7.30 p m. in the hope that their cooperation may be enlisted to help the community with its pollution problem These industry spokesmen will be offered the opportunity to explain what steps their companies are taking to avoid stream pollution in the disposal of their waste products.

In addition to the open discussion, Pennsylvania Board of Health representative Charles H. Kuder, assistant regional sanitary engineer at the West Reading Field Station, will speak on ways to prevent stream pollution.

The meeting is sponsored by the Lincoln Independent School Board, and is open to all area persons interested in the problem of stream and watershed pollution

SWCD Directors Finish Annual Meeting Plans

Arrangements for the March 8th annual banquet meeting of the Lancaster County Soil and Water Conservation District were in the final stages at the directors' meeting Tuesday night at the Courthouse.

The speaker for the evening will be Charles Hess, state director of soil and water conservation districts. Hess, a former vocational agriculture teacher at Manheim Central High School, is well known in the county.

The dinner meeting will be held in the Blue Ball Fire Hall and accomodations are plann-

FUTURE FARMERS OF AMERICA WEEK — FEBRUARY 19-26

AGRICULTURE - Dynamic...Challenging

FUTURE FARMERS OF AMERICA

Preparing For Tomorrow

Weather Forecast

Below normal temperatures are forecast for the next several days. The normal range for this period would be 43 to 24 degrees. It is expected to be colder at the beginning and end, and briefly milder during the middle.

Some precipitation is predicted, but the weather bureau is non-committal on the "snow or rain" question. They look for ¼-½ inch of moisture. If the temperature is cooperative, this will occur as rain about Tuesday or Tuesday night. If not, we may look forward to a white Wednesday.

Transfer Milk Efficiently From Cow to Bulk Cooler

The "Sputnick" MILK-PORTER is the cleanest, most efficient method for transferring milk from cow to bulk cooler.
- Manufactured from heavy gauge stainless steel.
- Lid seals tightly to keep milk germ free.
- Passes through openings 29" and over.
- Moves quiet and easily on rubber-tired, ball bearing wheels.
- Does away with long, expensive pipe lines, milk pumps and releaser.
- Two sizes.
- Low-cost sanitizing.

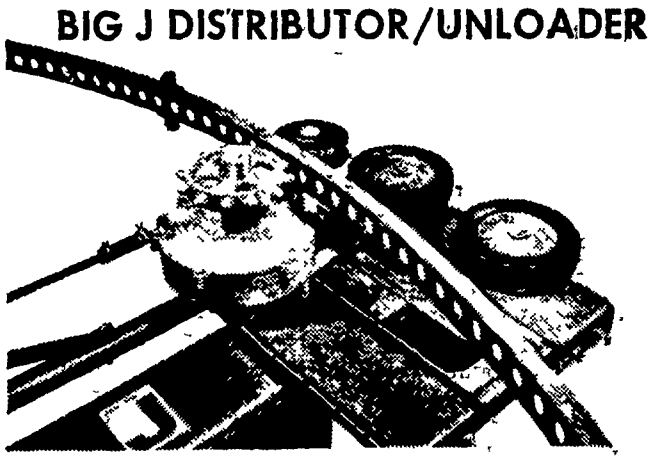
YOU'VE GOT TO HAVE A SYSTEM—GO JAMESWAY POWER CHORING
BIG J DISTRIBUTOR/UNLOADER



POWER CIRCLE DRIVE
works when others stop
...even in frozen silage

Rock-hard, solid-packed silage leveled from wall to wall . . . that's what you get with the Big J Power Circle Drive that doesn't depend on silage surface for traction. Tough, steel auger knives level cut through hard-packed or frozen silage with under and up action. Slip clutch slows forward motion so auger can chew its way through hard stuff — moves forward as need be.

3-Point Suspension — full support that keeps the unloader level at all times, lowers it evenly. As a result, it can't tilt or ride over when the going gets tough . . . can't burrow into fluffy new silage, high moisture corn or low-moisture grass silage. Can't stall or cause spoilage. And, you can unload right after filling.

hologist Cites Role Of Plant ease Study In Man's Survival

prevention of plant dis- is one of the sciences to man's survival, ac- g to Dr. John W. Heu- , chairman of the de- ent of plant pathology e University of Dela- "How well plant dis- are controlled is one major factor that de- termine how well we eat, what we wear and our abil- ity to provide shelter."

Plant diseases are not new, Heuberger says. They are mentioned several times in the Bible as "blightings, blasts, rusts, smuts and mil- dew." One plant disease played an important role in the development of the Unit- ed States. The "late blight" disease of potatoes and to- matoes caused the Irish po- tato famine in the 1840's, which resulted in the deaths of a million Irishmen and encouraged the emigration of a million and a half, mostly to the United States.

The continuing world food shortage and population cri- sis emphasizes the need for efficient crop production, Heu- berger stated. He believes plant pathologists, working with other plant scientists, will lead the battle against plant diseases to protect the food and fiber crops needed by the expanding population.

Plant pathology is the sci- ence that deals with plant diseases — their nature,

(Continued on Page 17)

'65 Best Crop Season In Several Years

Rains beginning in August reprieved late crops from early drought conditions, ac- cording to the Pennsylvania Crop Reporting Service. Lat- er maturing crops such as corn and later hay cuttings were involved. Yields in most areas turned out quite well for such a season, but conditions did not complete- ly overcome the effects of the dry months. Early season crops such as winter wheat, barley and first cutting hay fared well benefiting from rains which, while not abun- dant, were timely.

ALL CLASSES OF PA. LIVESTOCK REDUCED

Numbers of all species of farm livestock declined from January 1, 1965 to January 1, 1966. There were a total of 2,398,000 head of animals on Pennsylvania farms this January 1 — down about 4 percent from the 2,486,000 a year earlier. Cattle num- bers were down 3 percent or 56,000; hog numbers down 7 percent or 28,000; and sheep numbers down 2 percent or 4,000 head; sheep numbers at all-time low. Total inven- tory value was up 5 percent, however, to $365,931,000 re- flecting higher prices for all species.

CATTLE: Cattle and calves kept for milk declined almost 5 percent. This was partially offset by an increase in other cattle, beef type and bulls, of about 2 percent. Most of the decrease was in the num- ber of cows and heifers two years old and over kept for milk. Most other classes made smaller declines. The number of bulls held steady and only steers showed an increase.

HOGS: Hogs and pigs on Pennsylvania farms January 1, 1966 numbered 370,000, the smallest January 1 num- ber of record. This was 7 percent less than a year earlier and 26 percent below the (1960-64) average of 503,000. Inventory value of all hogs and pigs on hand was $15,207,000, up 44 per- cent from a year earlier and 16 percent above the 5-year average This was due mostly to the all time high value per head of $41.10.

POULTRY: The number of chickens on farms January 1, 1966 (excluding broilers) to- taled 16,907,000, a 6 percent decline from 1965 This was the ninth consecutive year of declining numbers and the lowest since 1935. Among the States, Pennsylvania ranks third in total num- bers Of the total chickens on farms January 1, 42 per- cent were hens, 53 percent pullets, and 5 percent other chickens.

U.S. CATTLE NUMBERS OFF ONE PERCENT

The January 1, 1966 in- ventory of cattle and calves on farms and ranches in the United States was 106,557,- 000 head. Dairy stock num- bers (milk cows and replace- ment heifers) continued to decline and were 6 percent below a year earlier. This reduction was partially off- set by a 1 percent increase in the number of other cat- tle, mostly for beef. Janu- ary 1, 1966 marked the end of seven years of record in- ventory highs for all cattle.

HOGS: The number of hogs and pigs on farms and ranches in the U.S. on Janu- ary 1, 1966 totaled 4 per- cent less than a year earlier. Inventory numbers of hogs decreased from a year earli- er in all regions except the South Atlantic which was up 2 percent and the South Cen- tral up 1 percent. In the Corn Belt (12 North Central States) January 1 numbers were down 5 percent from a year earlier. Iowa, the lead- ing hog producing State, had 2 percent fewer hogs on farms Hog numbers were down 7 percent in the North Atlantic States and 4 percent in the West.

For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

New "Look" For Chicken . . .

SPENCE

Chicken is the mainstay of many a family menu, thanks to its fine flavor low cost and versatility. All around the world you'll find chicken on menus It's been a favorite in many lands for centuries; in fact, people have been raising domestic fowl at least 2000 years.

If chicken is cooked properly it is juicy and delicately flavored. In America fried chicken seems to be the most popular way of eating it; oven frying is, however, becoming more popular every year It's the easiest way to fry crusty chicken without spattering the range and the cook

Try a new coating, a new flavor, with delicious dairy sour cream. Just prepare a mixture of dairy sour cream with lemon juice Worcestershire sauce salt and pepper, celery salt paprika and a little garlic Dip chicken in this creamy coating, then roll it in bread crumbs and arrange in a baking dish That's all! Simply bake it uncovered Don't turn or baste it it cooks itself to golden crisp perfection

CRISPY OVEN-FRIED CHICKEN

- 2 broiler-fryers (2½ to 3 pounds each) cut up
- 1½ cups dairy sour cream
- 2 tablespoons lemon juice
- 1 teaspoon Worcestershire sauce
- 2 teaspoons celery salt
- 1 teaspoon salt
- ⅛ teaspoon pepper
- ½ teaspoon paprika
- 2 cloves minced garlic
- 1 cup packaged dry bread crumbs

Wash chicken and dry on absorbent toweling In medium bowl combine sour cream with lemon juice, Worcestershire sauce celery salt salt, pepper paprika and garlic; mix well. Dip chicken into sour cream mixture; then roll in bread crumbs, coating thoroughly. Arrange chicken pieces skin side up in a 13x9x2-inch buttered baking dish Bake uncovered in a preheated 375 degree oven, 45-60 minutes or until chicken is tender and well browned Serves 6-8.

CHICKEN VEGARONI

- 4 pounds stewing chicken, cut up
- 6 cups water
- 2 tablespoons butter or margarine
- ½ cup chopped onions
- 1 package (10 oz.) frozen mixed vegetables
- 8 ounces medium shell macaroni
- 3 eggs
- ½ cup nonfat dry milk
- 1½ teaspoons salt
- ¼ teaspoon poultry seasoning
- ⅛ teaspoon pepper

In large covered saucepan cook chicken in 6 cups water until tender about 2 hours; reserve stock Cook chicken enough to remove meat from bones and coarsely chop to make 3 cups; reserve. Set out 9-inch square baking pan. Preheat oven to 350 degrees. Set large pan of water in oven. In large saucepan melt butter or margarine. Add onions and mixed vegetables and cook until onions are transparent. Meanwhile, cook macaroni in boiling salted water 8 minutes; drain Blend together 2 cups reserved stock (skim fat, if necessary), eggs nonfat dry milk, salt, poultry seasoning and pepper; stir into vegetables Stir in chicken and macaroni Turn into baking pan, spreading evenly. Place in oven in pan of hot water, bake 30 minutes. Cover and bake 30 minutes longer, or until knife inserted ⅔ of way to center comes out clean To serve, cut into 6 portions.

Chicken and stock may be refrigerated and remainder of recipe completed on day of meal, if desired.

Here are two ways to use left-over cooked chicken:

CHICKEN RY-KRISP

- 16 seasoned ry-krisp crackers
- 1½ cups cooked cubed chicken
- 4 eggs
- 2¼ cups and 3 tablespoons milk
- ½ teaspoon salt
- ⅛ teaspoon ground oregano
- ⅛ teaspoon white pepper
- 3 cups (10 oz.) shredded process American cheese
- ½ cup (2 oz. can) mushroom pieces and stems, drained*
- ¼ cup finely chopped onions

Heat oven to slow (325 degrees). Butter 9-inch square pan. Line bottom of pan with 8 crackers. Cover with chicken. Beat eggs until thick and lemon colored. Add 2¼ cups milk Mix well. Add seasonings, cheese, mushrooms and green onions. Mix well. Pour over chicken. Top with 8 more crackers and sprinkle with remaining 3 tablespoons milk. Bake 50 minutes or until sauce is smooth and thick but not firm. Remove from oven and let stand 5 minutes. Cut into squares. Makes 6-8 servings.

*Substitute liquid from mushrooms for part of milk.

* * * *

SAUCY CHICKEN

- 1 (10½ oz.) can cream of mushroom soup
- ½ cup milk

● For The Farm Wife

(Continued from Page 14)

¼ cup chopped green pepper
½ teaspoon crushed rosemary leaves
⅛ teaspoon ground black pepper
1 (5 oz.) can water chestnuts, sliced (optional)
1½ cups diced, cooked chicken
1 (4-oz.) jar pimiento slices
3 to 4 Holland rusks

In a saucepan, combine first five ingredients with water chestnuts, if desired; simmer gently for 10 minutes. Stir in chicken and pimiento slices; simmer an additional 5 to 10 minutes. Serve over Holland Rusks. Makes 3 to 4 servings.

Here is an easy way to get an Oriental flavor in your menus—

A U. S. Savings Bond, registered in co-owner or beneficiary form, becomes the sole and absolute property of the co-owner or beneficiary on the death of the owner.

For the Farm Wife and Family

By Doris Thomas, Extension Home Economist

Ladies, Have You Heard? . . .

THOMAS

You're A Considerate Foodshopper When You . . .

Handle fresh fruits and vegetables carefully — pinching or dropping can bruise them.

Push your cart with care. If you accidentally bump your cart into someone, stop and apologize sincerely.

Return merchandise to its proper place if you change your mind and buy another product.

Knock an item off the shelf and stop to pick it up and replace it on the shelf.

Learn the rules of the "express" line. Usually it's the number of items, not the *number of units that matter.*

Wheel the empty cart for family and company through to its proper place, meals.

* * * *

Some Things Worth Knowing About Baked Custard

Baked egg custard is a satisfying and delicious dessert

Time and temperature are important when baking custard. Custard becomes watery when baked too long or at too high a temperature.

Keep custard chilled until serving; warm custard will become watery around the edge.

Serve baked custard in cups or invert on serving plates, then remove cups. Garnish custard with chopped nuts, whipped cream, or fruit.

If you don't have a favorite basic custard recipe, your cookbook will give you a recipe with variations.

Safety Reminder For The Home

Stairs are not designed for storage . . . keep steps free from all items at all times.

FULTON GRANGE OPPOSES REMOVAL OF ORDER NO. 4

Fulton Grange #66 held its regular meeting February 14 at the hall in Oakryn. Master, Gyles H. Brown conducted the business meeting. The group went on record opposing the move by the U.S. Department of Agriculture and the New York milk shed to abolish milk marketing order #4 and to substitute order #2, which is in effect in New York and New Jersey. This would mean a great financial loss to local dairymen and not affect consumer prices, the grangers said.

Scott Ankrum and Stanley Stauffer Jr were appointed in charge of ticket sales for the Grange's annual turkey supper to be held April 2.

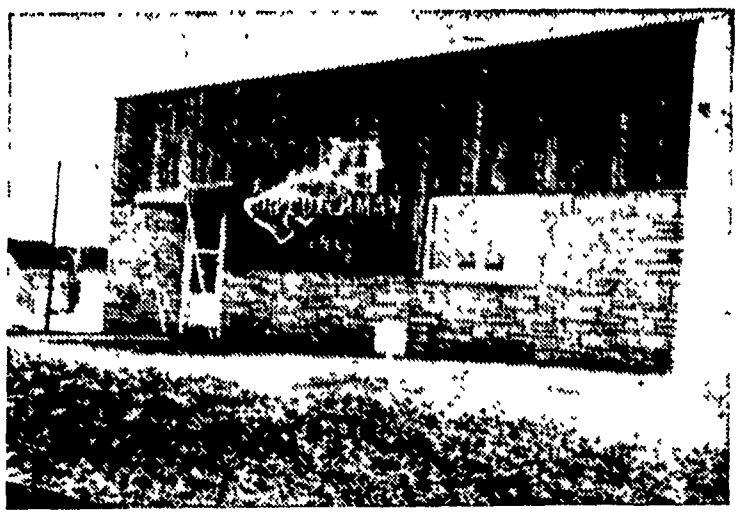
Fulton Grange and the Robert Fulton Fire Company have recently had the Fulton Township Servicemen's plaque repaired and painted and placed in front of the Fire Hall in Wakefield.

Miss Agnes Spence, lecturer, presented the following program in commemoration of famous Americans whose birthdays occur in February: Group singing "America"; Reading of Lincoln's Gettysburg Address by Rev. Kenneth Hill; Group singing "Love's Old Sweet Song" for St. Valentine's Day; Miss Spence spoke of Thomas A. Edison whose birthday was Feb. 11 and George Washington and their contributions to our nation Mrs. Chester A. Todd, Jr. conducted games.

The next meeting will be held February 28.

Weatherman on telephone: "MY corns hurt TOO, madam, but I still say it will be fair and warm!"

Sales of skim milk increased 7 percent in 1965, while sales of whole milk were up only 1 percent, according to U S. Department of Agriculture reports.



BIG DUTCHMAN OPENS NEW HOLLAND BRANCH

Big Dutchman, Inc., of Zeeland, Michigan, prominent manufacturer of automatic poultry feeders, recently announced the opening of a factory branch at New Holland, Pa.

The new company-owned branch is staffed with Big Dutchman sales and service personnel and is equipped to give service throughout the state, according to branch manager R. D. "Dick" Griffith. Emergency service will be offered on a twenty-four hour, seven-day-a-week basis.

The company branch will operate a fleet of sales and service vehicles. A large warehouse stock of Big Dutchman equipment is now on hand to supply immediate delivery to customers, Griffith said.

Big Dutchman now operates over twenty factory-owned branches throughout the United States, plus factory and distributor branches in nineteen foreign countries.

Plant Disease

(Continued from Page 13)

causes, development and control, Heuberger explains. The goal of plant pathologists is to reduce the billions of dollars lost to plant diseases every year in food crops, forest and timber lands, pastures, golf courses, nurseries and even home gardens and lawns. "Many more plant pathologists are needed than are being trained, particularly since there are only 2500 in the United States today, he says.

Southeast Pa. DHIA Plans Spring Conf.

The Spring Conference of southeastern Dairy Herd Improvement Association directors has been set for March 3. Lehigh County will host the conference this year which will convene at the Trexlertown Grange Hall.

The program will include reports from the treasurer, the plaque committee, the sate director, insurance, testing programs, the fieldman, and on weighing and sampling devices. To help in the reports, Herb Gilmore, Dexter Putnam and Carl Hollinger will be on hand.

The noon meal will be served by the ladies of the Trexlertown Grange. Any directors interested in attending are asked to contact the Lancaster County Agent's Office before February 25th.

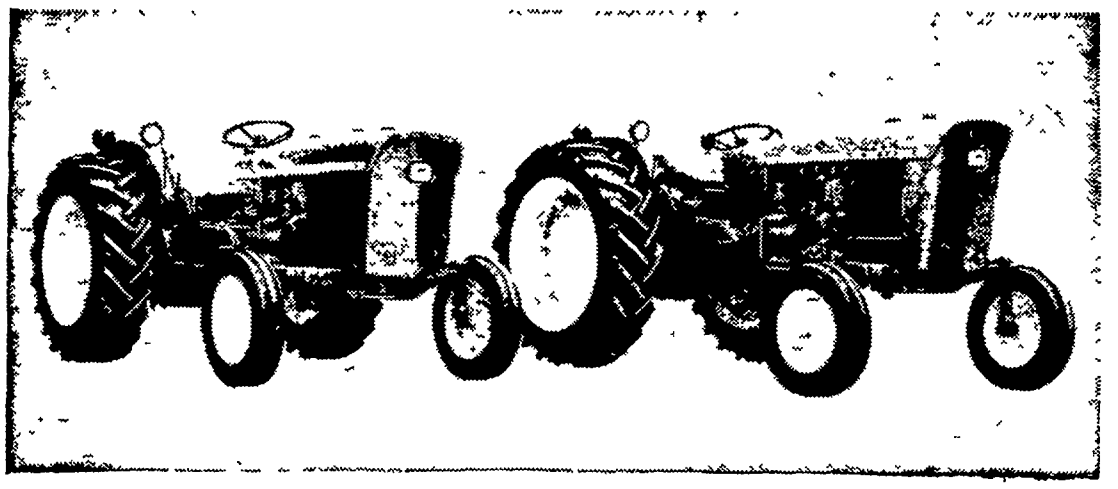
MESSICK FARM EQUIPMENT
On 230 West of Elizabethtown

2 power sizes,
3 crop clearances



The 38 h.p. 1020 and 53 h.p. 2020 can be yours with 17, 20, or 24 inches of crop clearance

When we say 2 new tractors, we really mean 6 — because the totally new "1020" and "2020" Tractors are both available in three different models. The LU Model is designed for utility jobs where compactness counts. It has a low hoodline and 17 inches of under-axle clearance. The RU Model has 20 inches of crop clearance, making it just as much at home cultivating row crops, as mowing alfalfa or loading manure. With 24 inches of crop clearance, the HU Model is ideal for the farmer who needs extra clearance and also desires a compact, highly stable tractor. Stop at our store soon . . . see all three models in both power sizes.

Farm Women Plan Projects

Society of Farm Women No. 1 held their meeting on Friday evening in the Lititz Recreation Center. Mrs. Nissley led the devotions. The roll call was answered by giving a quotation from Washington or Lincoln.

Mrs Roy Brubaker gave a report on the State Convention held recently at Harrisburg. The president asked for suggestions for the County project and the Farm Home was suggested. A contribution was made to Heart Haven. Since the membership of the group is 39 at present, it was decided to admit new members.

The entertainment for the evening was a film on sandwich making and the refreshment committee included Mrs. Neil Clark, Mrs. Amos Shenk and Mrs. Sangrey.

The next meeting will be held at the home of Mrs. Rudy Landis with Mrs. Richard Buchwalter and Mrs. Jay Foreman as co-hostesses.

FARM WOMEN GROUP NO. 25 MEETS

Farm Women Society 25 met at the home of Mrs. Albert Graybill Feb. 12. As a surprise the group then traveled on to The Willows.

Following refreshments, president Mrs Joseph Brenemesen conducted the business session at which plans were made for the March 15 bus trip of the group to the Philadelphia Flower Show Plans were also discussed for selling Easter eggs.

A recent film release on the Pa Dutch Country was shown, after which the group took a tour of the authentically furnished Amish house.

Mrs. John Metz received the gift of the month from Mrs Chester Eshleman.

Hostesses for the event were Mrs Kenneth Eshelman and Mrs Graybill.

The Society will meet on March 12 at the home of Mrs Brenemesen, Conestoga R1 at 1:30 p m Mrs Barbara Valvanes will speak on Greek customs and foods.

● Have You Heard

(Continued from Page 15)

If you have basement stairs without a guardrail, spend a few dollars and a few hours work building a guardrail It will be one of the best investments in safety you can make

When carrying loads of articles up or down stairs, keep the loads small and carry them to the side so you can see each step.

Take time to wipe up spills on the kitchen floor.

Avoid scatter rugs . . . they may turn into flying rugs. It this happens, then decorative value can be offset by medical costs in case of an accident

A good stepladder will be worth what it costs A chair or box is a poor substitute for a sturdy stepstool or ladder.

Use nonslip devices in the bathtub and in the shower.

Encourage your family to observe these safety reminders.

Weekly Poultry Report

Eastern Pennsylvania And New Jersey
WEEKLY SUMMARY

LIVE PRICES

Prices held unchanged on light hens. Demand good. Offerings lighter in some sections & barely adequate. Underlying sentiment improved following yesterday's release of Cold Storage Holdings which indicated considerably lighter supplies of processed frozen fowl on hand. Offerings on heavy hens limited for the good inquiry. Prices paid at farms: Light hens 8-9½, mostly 9-9½; Heavy hens 22c.

Fogelsville
February 15, 1966

Hens, light, 7½-9, mostly 8-8½; Hens, heavy, 13-27, mostly 16-22; pullets, 20-37, mostly 28-32; Roasters, 20-34½, mostly 25½-32; Ducks, 20½-32, mostly 24-29½; Drakes, 28½-41, mostly 33-38; Geese, 35½; Turkeys, Toms, 26-33½, mostly 30-33½; Turkeys, hens, 29-37, mostly 35-37; Rabbits, 16-50, mostly 41-48; Guineas, 37-55, mostly 45-47½; Pigeons (per pair), 65-85, mostly 65-77½; Jumbo Squabs, 85.

Total coops sold 743.

Eastern Shore Exchange
WEEKLY SUMMARY

Broiler and fryer live prices on the Eastern Shore Exchange averaged 16.76 cents per lb. this week, practically unchanged from last week's average. The high and low in the week's price range both occurred on Monday, 15.9 to 18.2 cents.

Sales for the week totaled 1.3 million head, slightly higher than last week's total.

Delmarva
February 18, 1966

Delmarva broiler and fryer average live prices declined nearly ¼-cent. Demand was fair for moderately heavy auction offerings. The supply of live birds was adequate for needs, with sizes in desired range.

Ready-to-cook demand was good for current delivery, and fill-in orders have been active

Estimated slaughter for Friday and Saturday, 924,000 head, compared to 860,000 head last weekend

In the 24 hours preceding market close on Friday, prices reported paid at farms on sales of 1,143 800 broilers and fryers ranged from 16 0-17 5 cents per lb.

● Chicago
(Continued from Page 2)

after mid-session Wednesday. Cows 50-75 higher and Bulls strong to 50 higher. In the Carlot Dressed Meat Trade, Steer Beef steady at the close, Heifer Beef steady to 50 lower and Cow Beef steady to 1.00 higher with most advance on Canner and Cutter.

SLAUGHTER STEERS — Prime 1150-1400 lbs. 29.00-29.50, closing 29.00-29.25, load 1465 lbs. 28.75, liberal number High Choice and Prime 1050-1400 lbs. 28.25-29.00, few up to 29.25 on Monday. Choice 900-1400 lbs. 26.75-28.50, Choice 1400-1515 lbs. 26.50-27.50, Mixed Good and Choice 900-1350 lbs. 26.00-27.50, Good 24.50-26 50, Standard and Low Good 22.50-24.75.

From Where We Stand . . .

Poultrymen Favor "Freedom" 9 To 1

A recent poll of poultrymen by the Northeastern Poultry Producers Council (NEPPCO) showed they would oppose a nationwide marketing order for table eggs at a ratio of nearly 9 to 1.

Eighty-five percent of the northeastern poultrymen responding to the NEPPCO poll indicated they did not favor marketing orders and production controls In effect, they said, "Please, Uncle Sam, we'd rather do it ourselves"! A truly radical sentiment in this day of governmental dependency.

It was interesting to see that size of operation had little effect on the negative sentiment Producers with between 25,000 and 50,000 layers were the least opposed to controls with 76 percent voting NO All other groups — from under 3000 hens to over 100,000 — rejected the control idea at a rate ranging from 83 to 89 percent

One confusing note is disclosed by the poll results From the questionaires directed to the state poultry associations in each of the 14 states served by NEPPCO Connecticut and New Jersey only indicated they would favor such enabling legislation New Jersey's response was probably predictable because of its unique situation. According to Richard I Ammon, NEPPCO executive director, its per acre real estate tax of $12 50 is not only the highest in the nation, but is eight times the national farm real estate average In addition, it ranks 44th among the 49 continental states in rate of egg production per layer, Ammon said The combination of these two items makes for some pretty unrealistic production costs. Even so, 61 percent of New Jersey poultrymen responding to the NEPPCO poll indicated they would not favor such controls

But the shocker was the favorable response by the Connecticut State Poultry Assn When one recalls the spirit of "Yankee" independence which historically made Connecticut, and New England, famous throughout the world, the two viewpoints are hard to reconcile. However, the Connecticut poultrymen responding individually to the poll vindicate our judgment of Yankeeland independence, they voted 87 percent against such controls This would seem to indicate that their state association is actually representing the best interests of very few poultrymen in Connecticut

In contrast, we were glad to see that 89 percent of Pennsylvania's poultrymen responding were in agreement with their state association in rejecting the idea of marketing orders and production controls for table eggs.

We agree wholeheartedly with NEPPCO's stand in opposing legislation which would permit such controls. Like NEPPCO, and the vast majority of poultrymen in the northeast, we subscribe to the basic principles of free enterprise and the free market system wherein "property is privately owned, privately managed, and operated for profit and individual satisfaction".

The egg industry, working within the framework of supply and demand, will solve its own problems. No national marketing order or production control legislation is warranted to try to raise the inefficient producers in one state to an acceptable national income level.

Future Farmers Of America Week

Lancaster County can be proud of its Future Farmers, not just during this nationally celebrated week — February 19-26 — but the year around

FFA boys from the county consistently lead the state with their achievements, as illustrated in a news story in your farm paper last week, stating that Lancaster County furnished 13 percent of the state's Keystone Farmers in 1965 — almost three times as many as the next highest county.

Also at the state level, their leadership and outstanding ability is generally reflected in the number of elected offices they traditionally hold

Vocational agriculture is taught in nine of our county high schools, and the high caliber of the men who teach these boys certainly deserves recognition in its own right. Through the vocational agriculture program the boys are provided with the basic knowledge and training they will need to enter farming, the broad agribusiness field, or to further their education.

The Future Farmer's organization supplements the regular school instruction by providing opportunities for leadership development Its goal is to help train young men for a wide horizon of agricultural occupations And this is a needed and valuable goal.

So Future Farmers of America, and especially of Lancaster County, we salute you!

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

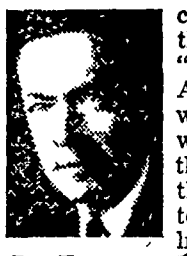
BY DR. KENNETH J. FOREMAN

Against God

Lesson for February 20, 1966

Background Scripture: Genesis 3 1-13, 72 74 Romans 1 18 through 2.11; Mark 7 14-23, I John 1 5-10
Devotional Reading: Psalm 51.1-12.

ANYBODY WHO read this column last week must have felt there was something wrong about it. The writer painted a picture with rose colored paint. He made it out that in the Bible man is located next to God, the one creature on earth that is like God, "in his image". All this fine talk when anybody who knows anything at all knows that men are often much more like devils than like God. Has the writer gone clear off his rocker, or is the Bible dismally, ridiculously wrong about man and mankind? Not at all. Man is by God's intention and purpose made in the image of God; this is man as God wants him to be. But no book is plainer than the Bible in showing that many a man is an abysmally long way from what God's dream for him is. The race of man has been infected with a disfiguring and disabling disease. The name of this disease is — SIN. Each person individually, and the race of man as a whole, is raddled with it.



Dr. Foreman

A race of liars

But sin is more than a misfortune, an accident, or a disease. Sin is something for which man is responsible. However much we may blame others or even blame God (as the first man did, in the Genesis story) the fact is, you are responsible, I am responsible. Each of us and all of us. For sin is an active, not a passive thing. It is as active as an armed rebellion; it is an armed rebellion — against God. Most sins are against people, but every sin is against God. Sin is utterly bad because at the root of it is a colossal pride, a lie that reaches to the his love, his wisdom, his truth, his will. Sin is the final folly. Sin is saying to God, "Get down off that throne and let me take your place. I know how to manage my life better than You do. I do not need Your help, I do not need You." Sin is so mingled with falsehood that in the Bible the Devil is called the father of lies.

From within

We can speak of sins in general, but we should not forget that no one ever commits sin-in-general. Sins are always particular, concrete. Jesus of course knew this. He once gave a rapid list of sins, (Mark 7) and then said a remarkable thing about them all. They all come from within, he said. The sins Jesus names are (we would say) partly visible and outward, partly invisible. Envy and evil thoughts, for instance, are "inner", while theft and deceit would be called "outer"; but Jesus says they are all "from within". A sin is just as real, just as personal, just as bad, whether in human eyes it can be seen or not. Sin—in other words — is not just what we do, it is the way we are. The cure for it must be something deeper than cutting off a bad habit here and there. The cure must be a change in our very selves, our spirit first of all.

But if not . . . ?

This is what "Conversion" means, isn't it? Conversion means a turning around, a turning of the entire self; from hating and despising and neglecting and slandering God, to loving and glorifying, and obeying and witnessing to God in every possible way. Only God really can turn us around. Only he can convince us we need to change, only he can reach those inner rooms of life from which emerge all our particular acts of thoughts of pride and disobedience, and to work the impossible miracle of bringing us to the point of accepting his love and not demanding it, — of saying Thy will, not mine, be done. But suppose we say a final No to God? Suppose our hearts are so icy that not even God's love will thaw them? Then — well, what is the prospect for any man in permanent rebellion against the Lord of all?

Letters To The Editor

Individuals Not Bound By Union Dictates, Reader Says

Editor,
Lancaster Farming

You are to be commended for your contradiction of the statement of James Patton urging the granting of dictating powers to labor unions

He should be informed that individuals may participate or not, at will, with cooperatives. Unions not only demand regular dues, but rob the member of his liberty by dictating that he subscribe to and abide by rules of the union, even to the ignoring of the laws of our nation.

Please continue to publish the truth in these matters.

Yours respectfully,
Ernest W Eshleman
Gordonville R1

Eggs Hit The Road In Workshop Trial Run

Eggs "hit the road" early in February as representatives of the industry in Indiana and Ohio, in cooperation with the Poultry and Egg National Board, held egg workshops for editors and other food communicators in selected Ohio cities. The workshops formed a trial run for what is hoped to be a series of similar workshops in some 20 other states.

In each of the cities in the trial run, the food communicators heard the latest about eggs, egg care, handling, preparation and serving. Questions submitted by the guests were answered, and information was distributed.

Local industry representatives told the guests about the extensive care taken in preserving the high quality of eggs during the production distribution and until the eggs are picked up by the consumers

By Max Smith, Lancaster County Agent

SMITH

To Feed Hogs With Cattle

Pork and manure are two of the hidden profits in the beef cattle feeding industry. When cattle are fed ear corn, shelled corn, or corn silage it is advisable that hogs be run with them to utilize the undigested feed in the droppings Shoats from 50 to 150 pounds each are the desirable size One pig for every 2 or 3 yearlings, and a pig for every 3 or 4 calves is recommended About ½-pound per day of hog supplement should be supplied for each pig For more rapid finishing extra grain from a self feeder may be provided for the hogs.

To Prevent Damping-Off

This is the time of the year when many greenhouse operators and growers of plants have trouble with a fungus disease known as "damping off" As the plant seedlings come up, they suddenly drop over and die Damp conditions encourage this problem. The trouble is most common in untreated soil Steaming of the soil or the use of chemicals can prevent this trouble Ferbam captan, or terraclor may be used as a soil drench

To Avoid Sowing Weeds

In the next several weeks many acres of alfalfa and red clover will be seeded by the broadcast method in winter grain All growers are urged to be certain they are not sowing weed seeds along with the legume; this is often done when using un-tested and non-Certified seed. Certified seed is always safer from additional weed infestation and good germination. If local seed is to be used, insist on meeting the law requirements of a germination test and weed seed count from the Bureau of Seed Certification at Harrisburg

PROTECT COWS

When winter winds blow, watch those open doors, broken windows and large cracks in the dairy barn, warns Joe Taylor, extension dairy specialist Drafts chill the udders of high-producing cows, and mastitis can result, says Taylor.

Speaking Of Records...

19,136 lbs. Milk
861 lbs. Butterfat

2-year-old Glee-Hi-Ivanhoe-Jean-Dolly who just finished 365 days with 19,136 lbs. of milk and 861 lbs. of butterfat.

OUR CONGRATULATIONS TO:

Harry and Glenn Freese, Side Brook Farm, Oxford, Pennsylvania.

The same 2-year-old already has 200 lbs. of butterfat in the first 51 days of the present record

Her dam, Dean Daughter, at six years and four months, finished 351 days with 23,546 lbs. of milk and 904 lbs. of butterfat.

Harry and Glenn Freese 40-cow herd average for the same period was 15,370 lbs. of milk and 589 lbs. of butterfat (this is up 50 lbs. from last year).

BETTER FEED PAYS BIGGER PROFITS.

County Libraries Get $56,000 In State Aid

Lancaster County public libraries recently received state aid in the amount of $56,282, it was announced this week by Governor Scranton's office

Five libraries in the county were among a total of 290 in Pennsylvania to share more than $2 7 million in such state aid This amounted to a dispersal of 15 cents per capita, up from last year's 12 5 cents figure. Governor Scranton has recommended that this amount be increased next year to 25 cents per capita.

Lancaster City library received the lion's share of the county's total, $49,754, Christiana, $257 Columbia, $4,624, Ephrata, $1,153, and Mount Joy, $494

"The resource centers, and 29 district library centers located in major marketing areas, provide special services on which all Pennsylvania citizens may draw, even if the patrons local library is not currently participating in the state aid program '

Since the program was first instituted in 1962, aid per capita has risen from 5 9 cents to the current 15-cent level The Library Code, enabling legislation for the program, allows up to 25 cents per capita to be paid In 1962, 55 percent of all existing public library facilities participated in the aid program. Today, 290 of the existing 467 libraries, or 62 percent, now qualify for assistance

Of the $2 6 million disbursed in 1965 approximately 40 percent was used for increased staff costs 39 percent for books magazines and other library materials, 14 percent for equipment, supplies and other operating expenses, and 7 percent for capital expenditures the State Library reported.

"Little Joe" The Shorthorn Takes One-Day Course In English Class

An all-white, all right Shorthorn steer named Little Joe found that going to school was no bonanza this week.

The 350-pound critter accompanied his owner John Welk to English class at Lampeter-Strasburg High School. Well, he didn't accompany John quite all the way — Little Joe received the English class in the agriculture shop where his owner used him as the subject for a speech assignment.

With Little Joe's able assistance, John explained to his classmates the different types of Shorthorns, and showed them what a judge looks for in the show ring — the deep round, the straight top-line, etc. He also discussed the care and management that must precede getting a 4-H Club steer to the Farm Show.

John, the son of Mr. and Mrs Leroy Welk of Strasburg R1, likes working with Shorthorns. In his first Farm Show effort, in 1965, he took the breed championship with his lightweight Shorthorn steer, Corky. Last year he placed third in the medium-weight class for that breed. This year he feels that Little Joe may have the potential to go all the way in the big state event. And why not? He will have had at least one more day of schooling than any of the competition!

Inter-State District 7 Meeting Date Set

District 7 of the Inter-State Milk Producers Cooperative, composed of the local associations from Lititz, Millersville, West Lampeter, and Donegal, will hold its annual business and dinner meeting on February 23, at 12 noon. The affair will take place at Hostetter's Banquet Hall, Mount Joy.

Dr. Paul E. Hand, economist with Inter-State, will be the guest speaker. He will explain the milk marketing conditions prevailing in the Philadelphia, New York, Baltimore, and Lancaster areas.

In addition, there will be a business meeting which will include election of all local officers.

Penn Manor To Hold A Quality Forage Series

A series of four meetings on "Quality Forage Production" will be held at the Penn Manor High School in the agriculture room. Dates are Feb. 22, March 1, 15 and 22. Meetings will start at 8 p.m.

SCHEDULE

Feb. 22 — "How rough is roughage." Richard Hackenberger will present this subject. Some of the questions to be answered include: the factors that affecting yields and quality; what yields to expect on your farm; and how farmers can make money.

March 1 — "Materials Handling Systems." A representative from the New Holland Machine Co. will discuss some of the new systems for handling forage.

March 15 — "Summer Annual Grasses, Don't Them Short." Chris N... — from A. H. Hoffman Co., Landisville will be speaker. This meeting also include forage jud...

March 22 — Panel d... sion on Forage Testing. ...bers of the panel will be Garber, farmer; Sterling ...mer, farmer; and Rich... Hackenberger, vo-ag tea...

The survey taken last ... on yields of hay, pasture ... silage will also be discus... at these meetings.

HALFWAY TO MARKET are these 100-pound porkers being raised as an FFA swine fattening project by Robert Weaver. He got started with swine when he was awarded the Sears' gilt several years ago. L. F. Photo

● Robert Weaver

(Continued from Page 1)

include such sports as baseball and basketball. Locally, he has participated in television programs which his chapter has presented in the Lancaster area. He traveled to Kansas City last Fall with several chapter-mates and their instructor to attend the National FFA Convention. During State FFA Week last summer at Penn State he achieved honorable mention in the Farm Mechanics contest. At the last annual meeting of the Inter-State Milk Producers' Cooperative in Philadelphia, he represented the Garden Spot Chapter.

In addition to all of these local and county chapter activities, he raises two acres of corn and one acre of tobacco, cares for a dairy heifer and a pen of fattening pigs These are the projects he carries as part of the vocational agriculture work experience program.

Bob, a quiet, but intense, sort of boy, appears to use his available time to best advantage. There isn't much wasted motion in what he does, and apparently his fellow FFA members recognized this efficient quality when they chose him to lead the county chapter this year.

● Pesticide Research

(Continued from Page 1)

from the Agricultural Extension Service and the Pennsylvania Department of Agriculture

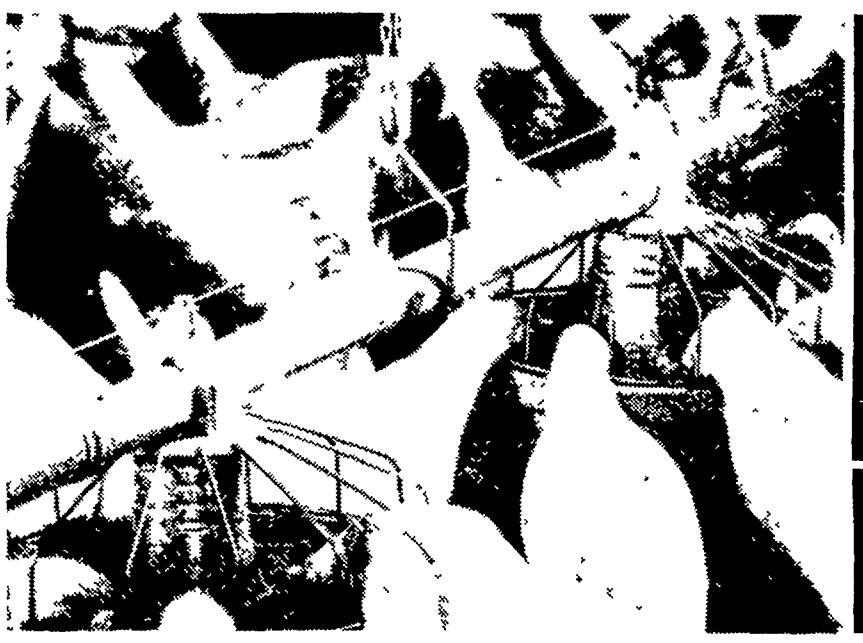
The stepped-up research program will answer some of the questions regarding the relation of pesticides to plant and animal ecology and human health Frear points out that research in the pesticide field is a highly specialized subject requiring large investments in equipment and manpower

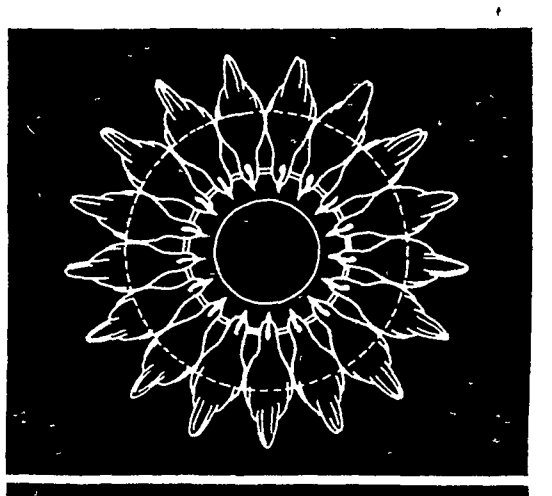
At the time chemical research on pesticides was begun at Penn State in 1933, less than a dozen insecticides were in common use, and about half that number of fungicides Today, hundreds of chemicals are used to control algae, birds, trees, snails, and rabbits — to mention a few. Most of today's chemicals are organic compounds, some of a highly complex nature, according to Frear.

Interest in cooperative work is already indicated by faculty members in fields of agronomy, animal science, plant pathology, and forestry and wildlife.

chore-matic

anderson





Anderson

SERVING ALL THE POULTRY INDUSTRY

ANDERSON BOX COMPANY INC • INDIANAPOLIS INDIANA

There are plenty of good reasons why Chore-Matic is America's top poultry feeding system (ask your neighbor, he probably has one). Any place in the house every bird has a complete, fresh, clean feed ration that's not picked over. Waste and contamination are virtually eliminated. Chore-Matic gives 30% more feeding space over trough type feeders. Entire line raises and lowers *easily* for fast floor cleaning. Auger gently moves feed to pans, doesn't grind or separate feed. And the versatile Chore-Matic system provides completely automated feeding for any size poultry house. Sure it's number-one. Always has been, always will be. But then it should. Chore-Matic is the original auger type feeding system.

● NEPPCO

(Continued from Page 1)

cent voiced direct opposition to the bill. Only 9 percent were in favor of it, and 5.6 percent indicated they had not yet formed an opinion.

Ammon then went on to say that these results clearly reinforce the statement of policy adopted by NEPPCO in October 1964 which reads:

"This Council supports the original concept of the Agricultural Marketing Agreement Act limiting federal marketing orders to the smallest practical area, and to the control of marketing of agricultural products.

"We oppose the use of federal marketing orders to control production and believe the use of nationwide marketing orders covering all producers of a commodity would be unworkable because they could not recognize the many and varied differences in production and marketing conditions in the various areas of the country. We further believe enforcement and administration would be excessively costly and would seriously abridge individual freedom and initiative."

Senator Case's motives were, according to the NEPPCO spokesman, quite commendable. However, to propose national legislation, just for the purpose of solving what NEPPCO describes as a purely local problem in New Jersey, is not working in the best interests of the entire industry.

Hearings on the proposed legislation have now been concluded. As yet there is no clear indication of the ultimate outcome, although Washington observers give it little chance of passage in this session.

KETOSIS TREATMENTS

AVAILABLE IN LIQUID or PELLETS

AGWAY KETOSIS TREATMENT —

This is a feed grade propylene glycol. Ketosis is a metabolic disease of high producing dairy cows which has plagued dairymen for many years. Most dairy scientists agree that primary ketosis is caused by an acute glucose deficiency. Because propylene glycol when taken into the body is a ready source of glucose, it acts by helping to make up this deficiency. Propylene glycol is used in Agway's Ket-A-Way feed for prevention of ketosis, but there is a real need for propylene glycol in liquid form for either prevention or treatment of the early stages of ketosis. **Agway Ketosis Treatment** will be available in one-gallon plastic bottles and in 55-gallon drums on special order.

AGWAY KET-A-WAY

Agway Ket-A-Way is an all-pelleted, high energy feed that has been found to be the most effective Ketosis treatment and preventative on the market. It has these factors found to be effective in treating and preventing Ketosis. They are High Energy Propylene Glycol, Cobalt, and High Protein.

High Energy —

Ketosis basically is a dietary energy deficiency. Ket-A-Way helps to make up for that deficiency.

Propylene Glycol —

Ket-A-Way contains 5% propylene glycol, the latest and most successful aid in the prevention and treatment of Ketosis. Propylene glycol has been found as effective . . . and in some instances even more effective, than lactates or propionate. At the same time it has none of the palatability problems of these other two items.

● SWCD

(Continued from Page 1)

ed for approximately 300 persons. Tickets were distributed by Garland E. Gingrich, district secretary-treasurer, and are available from any associate director or cooperating agency (FHA, SCS, ASCS, Fish & Game Commission, and County Extension).

The directors voted to publish the district's annual report in Lancaster Farming again this year, and some consideration was given to putting the report out in brochure form next year.

The meeting of the district directors with the Lancaster County Planning Commission which was canceled by the recent snow storm has not as yet been rescheduled. The directors hope for a March date.

In other business, county conservationist Wayne Maresch reported on work done by his Soil Conservation Service office last month. Eighty-one landowners were contacted, Maresch said, and of these, 33 were helped to apply practices. Thirteen complete conservation plans were developed, and seven additional plans were revised A total of 2750 lineal feet of cropland terraces were constructed.

Seventeen new plan applications were approved by the directors, and 21 old plans were canceled.

The next regular directors' meeting was set for March 14 at the Courthouse.

● Dead Pigs

(Continued from Page 12)

farrowings, disease build-up is reduced.

● Ventilation is a MUST in central houses. If moisture condenses on walls and ceilings, ventilation measures are necessary.

Thoroughly scrub sows with soap before they enter farrowing quarters.

Use some method of control to prevent pig loss from crushing. The most common methods are guard rails or farrowing stalls. In addition, frequent observation at farrowing time will pay good wages.

Minimize human, animal, and bird traffic in farrowing houses to reduce exposure to contagious diseases.

[illegible] or combination of diseases in sows is causing them to dry up. This results in pigs only a few days old starving. Not much is understood about this condition. It should be handled by a veterinarian as quickly as it is noted.

Baby pigs need protection from anemia by the time they are three days old. Iron injections or iron feeding, or a combination of both, are recommended.

Creep feeding as early as possible should be encouraged.

Bradley reminds that "attention to details at farrowing time this winter will afford greater economic opportunity than usual.

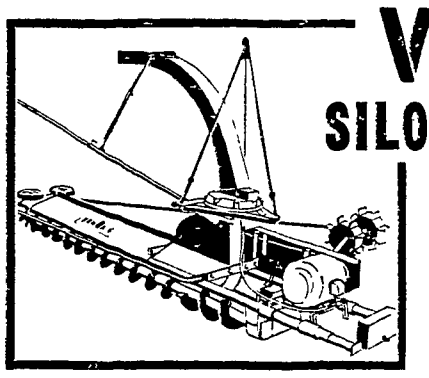
Complete automatic feeding for DAIRY COWS and CATTLE!

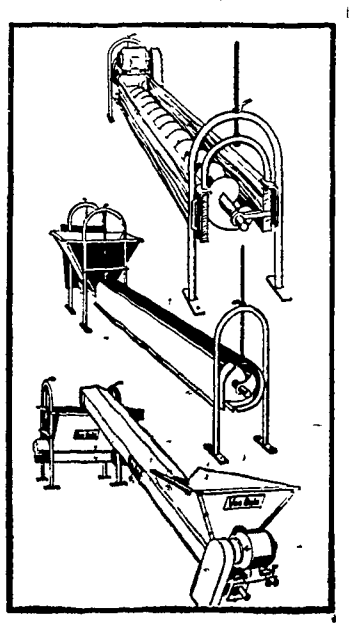
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost Patented V-paddle impellers *throw* . . . not blow . . . silage down chute Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

Specialists Seek An Agricultural Solution For Viet Nam Problems

by Harold Joiner

(EDITOR'S NOTE: This story was written for members of the Newspaper Farm Editors of America by its president, Harold Joiner of the Atlanta Journal, who accompanied Secretary Freeman on this Viet Nam visit).

SAIGON, February 15 — A team of American agricultural specialists concluded here this week that agricultural improvements can drastically assist the overall military conflict in this country.

The top-level teams have visited all parts of the South Vietnamese countryside to get grass-roots level information on the current programs, and to see what recommendations can be made to further assist the economy that is nearly 85 percent agricultural

Specific recommendations will be made to President Johnson upon the arrival back in Washington of the team which is led by Secretary of Agriculture Orville L Freeman

Pressing needs include additional lumber facilities One of the team members Robert Dwyer of Portland Ore a private lumberman has elected to remain in Vietnam for another few days to finalize plans for introduction of a lumber complex

Credit systems apparently will be a major area in which the American team will dwell in its final report Several of the team members expressed concern over both lack of adequate credit and high rates of interest

The team was unanimous however in expressing pleasure at the progress of the Vietnamese people in recent years Much of this progress has come through technical assistance provided through U S programs

Freeman said he found more agricultural development than he had expected, and said this would provide a base on which still further improvement could be made

He and the team members emphasized however that such a program would not show dramatic, overnight results Rather they will be designed to alleviate immediate problems and will also aim at a long-range economic improvement

Dr Charles B Ratchford of the University of Missouri said he found farmers in all areas aware of the need for improved seed fertilizer, pesticides and other modern farming tools

"They are aware of these tools and are ready to go with them he said upon completion of his 3-day visit to the provinces

Robert Nathan a nationally-known Washington econo-

● 4-H Play

(Continued from Page 1)

Lilli Ann Wivell, Nancy Risser and Kathleen Ney These youngsters have worked hard and enthusiastically in preparing this year's effort and they report it is a play that the whole family will enjoy

The money derived from ticket sales for the 4-H play provides the funds that the County Council uses to sponsor such events as the Leaders Banquet 4-H Field Day and other county-wide activities

Tickets may be obtained from any cast member, or at the door on the nights of the play. Price to adults is $1.00, children, 50 cents.

No Profits In Dead Pigs, Specialist Says

The value of a pig to a farmer has seldom been higher than it is now. In view of present high prices, every pig farrowed and saved represents increased profit, says Melvin Bradley, extension livestock specialist from Missouri.

Bradley suggests several factors to consider to produce good healthy litters.

He points out that litter size is influenced at time of mating by age and health of parents On an average, litters from sows are larger than from gilts. Sows pass on to their pigs more immunity to disease than do gilts Some swine breeds naturally produce larger litters than others and work well in a crossbreeding program

Sows and gilts should be prevented from getting too fat during gestation. Research indicates hand feeding in stalls is a good way to regulate condition of sows and gilts, especially if they run together.

Although elaborate central farrowing houses are not necessary to save pigs, supplemental heat is considered necessary by most producers. Safety from fire should be a major factor in selecting, installing, and operating heating equipment.

Farrowing quarters should be cleaned and disinfected before sows are brought in. The hard labor needed to do this job will pay dividends.

Two principles are noted with respect to farrowing quarters.

● Few producers are successful with continuous farrowing in them It quarters ar cleaned and allowed to remain empty a minimum of two to three weeks between

County Crops & Soils Day Set For Feb. 25

The 6th annual Lancaster County Crops & Soils Day will be held next Friday, February 25, at the Guernsey Sales Pavilion.

According to Arnold G. Lueck, associate county agent, the program will emphasize current trends and thinking on forage crops and fertilizers, with considerable time spent on the latter.

"It will be a well-rounded program which promises to be of interest to all farmers," Lueck said.

Four Penn State Extension men will be on the program; three agronomists and one entomologist

Lunch will be available.
